AHMED ASKRI

Computer Science Engineering Student (ENSI) – Seeking a 5-6 month AI end-of-studies internship (PFE) from February 2027

Tunis, Tunisia (**international mobility**)
Email : ahmedaskri021@gmail.com Phone : +216 92 09 52 99 LinkedIn : ahmed-askri-84594430a GitHub : ahmed-askri

PROFILE

Computer science engineering student at ENSI, specialized in **AI systems**: hybrid **RAG** retrieval (**CodeSensei**, +6.54 points Recall@5), multi-agent orchestration with guardrails (Synthesis, Sentinel) and automated CI evaluation (AgentLens). Focused on reliability and deployment (Docker, FastAPI).

TECHNICAL SKILLS

Agentic AI & LLM :	LangGraph, CrewAI, RAG, reranking, LLM (Claude, Groq, open-source), MCP, Guardrails (prompt-injection)
ML & Deep Learning :	CNN, Transformers (MViT), NLP, YOLO, GNN, Diffusion Models, Generative AI, Pruning & Quantization (Edge AI), PyTorch, TensorFlow
MLOps & Tools :	MLflow, LangSmith, Docker, FastAPI, Automated testing, Great Expectations, Git, GitHub Actions (CI/CD)
Languages :	Python (Pandas, scikit-learn, OpenCV), SQL, C, C++, C#, Java, PHP, JavaScript, TypeScript, Linux

WORK EXPERIENCE

AI Engineering Intern – SafeStation Platform
Smart For Green, Tunis, Tunisia | *06/2026 – 07/2026*

- Designed a **real-time video detection** system combining **YOLO26x** and a spatio-temporal **MViTv2-S** Transformer, reaching **90.24% precision** on test videos
- Deployed the model to production via a **Docker + FastAPI/WebSocket** microservice, with live video streaming (HLS)

  Stack: *Python, PyTorch, TensorFlow, Pandas, scikit-learn, OpenCV, YOLO26x, MViTv2-S, Docker, FastAPI, WebSocket, HLS*

R&D Intern – Medical Deep Learning
LARODEC Laboratory, Tunis, Tunisia | *06/2025 – 07/2025*

- Designed and trained a **Wavelet Guided Attention CNN** for skin cancer detection on medical images
- **Optimized via pruning and quantization** for embedded deployment (edge AI); evaluated on precision, recall, F1-score, AUC-ROC

  Stack: *Python, PyTorch, TensorFlow, Pandas, scikit-learn, OpenCV*

Technical Support Assistant (Part-Time)
Concentrix, Tunis, Tunisia | *06/2025 – Present*

- Resolved technical issues for an international client base, strengthening communication under pressure

PROJECTS

CodeSensei – Improvement of CodeFuse-CGM (LLM + GNN) | Project Link

- Improved CodeFuse-CGM, a hybrid **LLM** (Qwen-72B) + **GNN** system with a full **RAG** pipeline (hybrid BM25 + embedding reranking), improving stage-2 **Recall@5** by **6.54 percentage points** over the CodeFuse-CGM (72B) baseline on SWE-bench

  Stack: *Python, LangGraph, FastAPI, Claude API / open-source LLMs, Qwen-72B, GNN, BM25, embeddings, MCP*

Synthesis – Multi-Agent Research Assistant with Guardrails | Project Link

- Multi-agent research assistant: sourced search (arXiv, trusted domains) with claim verification via exact-quote citation and layered guardrails (anti-**prompt-injection**, role-based tool permissions, human approval)
- CrewAI prototype revealed source hallucinations in the agent's final answer; moved safety checks into the tools themselves – 50+ tests, CI

  Stack: *Python, LangGraph, CrewAI, MCP, pytest, CI*

Sentinel – Agentic Reasoning Layer for Video Surveillance | Project Link

- Developed a **LangGraph** agent (LLM via Groq) that assesses the severity of events detected by the **YOLO26x/MViTv2-S** pipeline and autonomously decides on escalation

  Stack: *Python, LangGraph, Groq, YOLO26x, MViTv2-S*

AgentLens – Evaluation and LLMOps Pipeline for AI Agents | Project Link

- Built an evaluation pipeline that scores an agent across **22 scenarios**, run automatically in CI on every push (**MLflow**, **LangSmith**)
- Detected a flaky scenario via LangSmith tracing, fixed by setting `temperature=0`

  Stack: *Python, MLflow, LangSmith, CI*

Additional Projects : KKBox Churn (LightGBM, AUC 0.86); **BigQuery + dbt ELT pipeline** (10M rows); **ArtRevive** (AI-generated art restoration)

EDUCATION

National Engineering Degree in Computer Science – Final Year
National School of Computer Science – ENSI, Manouba, Tunisia | *2024 – 2027*

Preparatory Cycle, Math-Physics – National Ranking: 307th / 1739
Tunis Preparatory Institute for Engineering Studies – IPEIT, Tunis, Tunisia | *2022 – 2024*

CERTIFICATIONS, ACTIVITIES & LANGUAGES

Building AI Agents with Multimodal Models *(2025)* – NVIDIA Deep Learning Institute
Active Member : IEEE ENSI Student Branch • ENSI Competitive Programming Club (ECPC)
Languages: Arabic (native) • French (C1) • English (C1) • German (A1)
